

5.5 Ton Foldable Mini Crawler Crane

The 5.5 ton mini foldable crawler crane is designed for use in narrow working spaces. It features hydraulic winching, stretching, and slewing systems.

Overview

Compact Power for Narrow Spaces

The 5.5 Ton Mini Crawler Crane is a versatile lifting solution engineered specifically for operation in confined working environments where traditional heavy-duty cranes cannot access. Utilizing advanced design methodologies like 3D solid modeling and finite element analysis, this unit offers superior flexibility, stable performance, and reliable operation. Its hydraulic crawler system ensures maneuverability across challenging terrains, making it an essential tool for construction, maintenance, and industrial projects requiring precision.

General Information

Model	HXB 5.5
-------	---------

Performance & Lifting

Crane Capacity

5.5 t Max Capacity	1.8 m At Radius
------------------------------	---------------------------

Max Operating Radius	16 m
Max Lifting Height	16.9 m

Winch System

Hook Up Speed	10m/min (4 falls)
Wire Rope Specifications	Ø10mm x 80m

Boom System

Boom Form	5 section with fly jib
-----------	------------------------
