

# 5.5kW Single-Phase Gasoline Generator

This 5.5kW gasoline generator provides a reliable source of 220V electrical power. It features AC and DC outlets, a voltmeter, a circuit breaker, and an electric start system.

## ADDITIONAL IMAGES

## Overview

### High-Performance Gasoline Generator

This 5.5kW single-phase gasoline generator is designed for reliable power generation in various environments. It features a robust 420cc engine and a full copper alternator for efficient and durable performance. Equipped with electric starting, an AVR system, and an engine oil warning system, it ensures both ease of use and operational safety.

## Performance

### Rated Power

**5.5 kW**

Rated Output

**6 kW**

Max Output

### Engine Specifications

Feature	Specification
Displacement	420cc
Fuel Type	Unleaded Gasoline
Fuel Tank Capacity	15L
Alternator Material	Full Copper

## Electrical & Control

### Electrical Outputs

- 220V AC Output
- DC 12V 8.3A Output

### Control & Safety Features

AVR Equipped, Engine Oil Warning System, Electric Start, Circuit Breaker, Integrated Voltmeter

### Battery Specifications

12V 8Ah/20HR Sealed Lead-Acid

## Certifications

### Compliance

CE Certified
