Overview

Instant Hot Water Efficiency

This 5.5L tankless water heater is engineered for immediate, on-demand hot water supply, eliminating the energy waste associated with traditional storage tanks. Designed for residential applications, it features intuitive adjustable controls for temperature and water flow, ensuring customized comfort for the user. Built with essential safety mechanisms including overheat protection and flame failure detection, this compact unit offers a reliable solution for efficient water heating.

Performance

Hot Water Capacity

5.5 L/min

Flow Rate

11 kW

Rated Heat Input

Operating Parameters

Parameter	Value
Water Pressure	0.02~0.8 MPa
Energy Efficiency	Level 2
Exhaust Type	Constant temperature strong exhaust

Installation & Requirements

Rated Gas Pressure

- NG: 2000 Pa
- LPG: 2800 Pa

Compatible Gas Types

Natural Gas (NG), Liquefied Petroleum Gas (LPG)

Mounting

Wall-mounted
