

# 55W HID Xenon Conversion Kit

This 55W HID xenon conversion kit provides high brightness for car lighting. It operates within 9V-16VDC, draws 4.3A, outputs 55W, and withstands -40°C to +105°C.

## ADDITIONAL IMAGES

## Product Overview

### High-Intensity Automotive Lighting

This HID Xenon conversion kit is engineered to provide superior brightness and reliable performance for automotive lighting systems. Featuring a quick-start mechanism and high-intensity discharge technology, it delivers a powerful output of 4200 lumens to ensure enhanced visibility on the road. The system is built for durability, offering excellent heat dissipation and resilience against water, dust, and shock in demanding environments.

## Technical Performance

### Performance Metrics

<b>42 W</b> Actual Wattage	<b>4200 Lm</b> Brightness	<b>23 KV</b> Max Voltage
-------------------------------	------------------------------	-----------------------------

<b>Input Voltage</b>	DC 9-16V
<b>Rated Lifespan</b>	3000 Hours
<b>Operating Temperature</b>	-40°C to +105°C

## Compatibility

### Available Color Temperatures

- 6000K
- 8000K

<b>Bulb Socket Types</b>	H1, H3, H4, H7, H8, H9, H10, H11, H13, H16, H27, HB3, HB4, HB2
--------------------------	--

## Features

### Key Features

Waterproof • Anti-dust • Shockproof • Easy Installation • High Heat Dissipation

## Support

Warranty Period

16 Months
