

56-Inch 12V DC Ceiling Fan

This 56-inch ceiling fan is designed for 12V DC power, making it ideal for off-grid or low-voltage environments. Its three-blade design ensures efficient air circulation.

Product Overview

High-Efficiency DC Ceiling Fan

This 56-inch ceiling fan is engineered for versatile off-grid and low-voltage applications, featuring a reliable DC brushless motor. Designed for energy efficiency, it consumes only 36W of power while delivering robust airflow. With support for multiple power sources including solar panels and DC 12V systems, it is an ideal cooling solution for homes, RVs, and marine environments.

Technical Specifications

Rated Speed

320 RPM
Max RPM

Motor Type	DC Brushless
Power Consumption	36 W
Compatible Power Sources	DC 12V, Solar Panel, AC 220V (via adapter)

Design & Build

Blade Diameter	56 inch
Case Material	Metal

Control & Operation

Speed Control	5-level controller with regulator and remote
Air Supply Type	Wide-angle, directional adjustment
