Product Overview

Versatile Multi-Purpose Rope

This 5/8-inch solid braid polypropylene rope is engineered for durability and performance across diverse environments, from marine settings to general utility tasks. Its MFP (Multifilament Polypropylene) construction offers a superior balance of strength and softness compared to traditional polypropylene, while remaining a more economical choice than nylon or polyester. Designed to be round, flexible, and smooth, this rope resists unraveling even when cut, ensuring reliability for your specific application needs.

Technical Specifications

Dimensions

0.625 inch
Diameter

140 ft
Length

Working Load Limit

105 lbs

Material & Construction

Construction

Solid Braid

Material

Multifilament Polypropylene (MFP)

Performance Features

Handling

- Floats in water
- Holds knots well
- Flexible and smooth
- Will not unravel when cut

Performance Attributes

Buoyant, Abrasion-resistant, Rot-resistant, Mildew-resistant, Chemical-resistant, Kink-resistant
