Product Overview

High-Performance Engine Block

This long block engine component is precision-engineered to serve as the core structural foundation for internal combustion engines. Designed for optimal durability and performance, it features integrated coolant passages and oil galleries to ensure reliable operation under demanding conditions. It is built to meet or exceed original equipment specifications, providing a seamless fit for compatible automotive applications.

Technical Specifications

Supported Components

- Crankshaft
- Connecting rods
- Pistons

Compatible Engine Model

5L

Material

High-strength cast iron alloy

Key Features

Precision-machined cylinder bores, Robust main bearing supports, Integrated oil galleries, OEM specification compliant
