

5T-1000T Double Girder Bridge Crane

This double girder bridge crane is suitable for indoor or outdoor fixed cross intercropping handling and transport work. It offers a lifting capacity range of 5T-1000T, with working levels A3, A5, and A6 available.

Overview

Industrial Double Girder Overhead Crane

This double girder bridge crane is designed for robust indoor and outdoor material handling and transport operations. Engineered for stability and strength, it features a dual-girder bridge mechanism, a trolley frame, and advanced electrical components. It offers versatile operation modes, including ground control, remote operation, and driver's cabin, making it suitable for a wide range of industrial environments.

Performance Specifications

Lifting Capacity

5 T

Minimum Capacity

1000 T

Maximum Capacity

Application Guide

Working Level	Typical Application
A3	Power plant maintenance / Infrequent use
A5	Factories, mines, workshops, and warehouses
A6	Heavy-duty / Frequent use

Working Levels

A3, A5, A6

Technical Details

Operation Modes

- Ground operation
- Remote operation
- Driver's cabin

Speed Control Options

- Fixed speed
- VVVF inverter type

Suitable Environments

Indoor • Outdoor
