

5V 1A Power Adapter

This power adapter is designed for universal input voltage ranging from 100-240V at 50/60Hz. It provides a regulated 5V DC output at 1000mA (1A).

Overview

Reliable Power Solution

This compact power adapter provides a stable 5V DC output at 1000mA, making it an ideal choice for powering a wide range of small electronic devices. Designed for global use, it supports a universal input voltage range of 100-240V. Its efficient and reliable performance ensures consistent power delivery for your equipment.

Electrical Specifications

Key Electrical Metrics

5 V

Output Voltage

1000 mA

Output Current

Input Voltage Range	100-240V
Input Frequency	50/60 Hz
Input Current	0.25 A

Compliance & Origin
