

5W/40 Engine Oil for Off-Road Vehicles

This engine oil is suitable for high-level imported and domestic diesel and gasoline off-road vehicles. It provides excellent protection for modern engines with variable valves, variable compression ratios, in-cylinder direct injection, and turbocharging.

Product Overview

High-Performance Off-Road Engine Oil

This 5W/40 synthetic engine oil is engineered specifically for the rigorous demands of off-road vehicles. Utilizing advanced sludge-cleaning technology, it effectively removes carbon deposits while providing superior wear protection under high-temperature and high-load conditions. The formulation is designed to enhance engine power and ensure reliable performance during challenging driving experiences.

Technical Specifications

Viscosity Grade	5W/40
Net Volume	4 L

Standards & Compliance

ACEA Standards	
ACEA A3	
API Standards	CI-4, SL

Performance Features

Key Benefits

- Advanced sludge removal technology
- Superior carbon deposit control
- High thermal stability
- Enhanced engine power output
- Excellent wear protection under high load
