

5W/50 Cold Climate Diesel Engine Oil

This diesel engine oil is suitable for turbocharged high-power engines in commercial vehicles and buses. It meets European VI (National VI) emission standards and complies with ACEA e7-08 and API CI-4 requirements.

Product Overview

High-Performance Cold Climate Diesel Engine Oil

Designed specifically for heavy-duty vehicles operating in severe winter conditions, this engine oil ensures reliable performance and easy cold starts. It utilizes advanced oil pressure management technology and ultra-low temperature additives to maintain stable pressure even under heavy loads and steep road conditions. This formulation provides consistent engine protection and power delivery across all seasons, making it an essential choice for cold region operations.

Technical Specifications

API Standard
CI-4

Viscosity Grade 5W/50

Key Features Cold Start Optimized, Heavy Duty, Oil Pressure Management, All-Season

Packaging & Logistics

Available Volumes

- 4 Liters
- 18 Liters
