

6 1/2" 316L Stainless Steel Water Well Screen

This 6 1/2" water well screen is constructed from 316L stainless steel. It is designed for efficient water filtration in well applications.

Product Overview

High-Performance V-Wire Well Screen

This 6 1/2 inch STC water well screen is engineered from high-quality 316L stainless steel, offering exceptional corrosion resistance and durability. The v-wire design provides a large open area and precise slot dimensions, ensuring efficient filtration while preventing clogging. Its robust structure is designed to extend the service life of wells and minimize energy consumption through superior water flow.

Available Materials

316L Stainless Steel, 304 Stainless Steel, Low Carbon Steel, Galvanized Steel

Technical Specifications

Physical Dimensions

6.5 inch

Nominal Diameter

6 meters

Maximum Length

End Connections

Plain beveled ends • Threaded

Slot Size Range

0.10mm to 6.00mm

Construction Details

Wire and Rod Configuration

Component	Width Range (mm)	Height Range (mm)
Wire Size	1.50 - 3.70	2.20 - 6.30
Support Rods	2.30 - 3.70	2.70 - 6.30
