

6-Cylinder Marine Diesel Engine

This marine diesel engine features a 6-cylinder configuration, providing a balance of power and efficiency for marine applications. It is designed for durability in demanding marine environments and includes a turbocharger and high-pressure fuel injection for optimized performance.

Overview

High-Performance Marine Propulsion

This 6-cylinder marine diesel engine is engineered for reliability and efficient operation in demanding marine environments. Featuring a robust in-line, four-stroke, direct-injection design with water cooling, it delivers consistent performance across medium and high-speed ranges. It is an ideal power solution for inland waterway transport, commercial fishing vessels, and public service craft.

Performance Metrics

Power Output

240 hp

Minimum Power

500 hp

Maximum Power

Operating Speed

1500 r/min

Min Speed

2150 r/min

Max Speed

Technical Specifications

Configuration	In-line, 6-Cylinders, 4-Stroke, Direct-Injection
Cooling Type	Water-cooled

Applications

Suitable Vessels

- Inland waterway transport ships
- Fishing boats
- Public vessels
