Product Overview

Professional 6-Gang Marine Control Solution

This 12V/24V rocker switch panel is a comprehensive control hub designed for marine, RV, and automotive applications. It integrates six illuminated switches, dual USB charging ports, a digital voltmeter, and a power socket into a single waterproof unit. Built with flame-retardant materials and featuring a durable aluminum faceplate, it provides a reliable and organized way to manage your vehicle's electrical systems in demanding environments.

Electrical Ratings

Rated Current

20 A
at 12V

10 A
at 24V

Operating Voltage

12V DC, 24V DC

Integrated Components

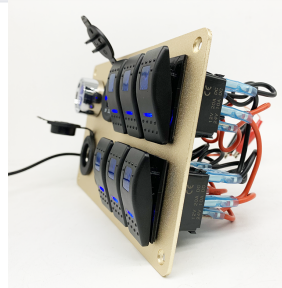

Panel Components

- 6 x SPST ON-OFF Rocker Switches
- 1 x Digital Voltmeter (8.8.8 Display)
- Dual USB Charging Ports
- 1 x 12V Cigarette Lighter Socket
- 1 x Horn Button

USB Charging Output

Port	Voltage	Amperage
Port 1	5V	1A
Port 2	5V	2.1A

Physical Construction

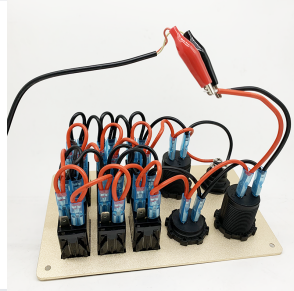

Environmental Protection

Waterproof • Dust Resistant • Debris Resistant • Rubber Sealing Covers

Materials	Aluminium, ABS Plastic, Metal, Flame Retardant Materials
LED Illumination	Blue LED Light

Installation & Environment

Recommended Applications

- Marine Boats
- RVs and Campers
- Off-road Vehicles
- Buses
- Trailers
- Motorcycles

Operating Temperature	-25°C to +85°C
Switch Pin Configuration	5 pins
