Product Overview

Versatile 6-Gang Marine Control Panel

This waterproof rocker switch panel is a comprehensive solution for managing electrical systems in marine and automotive environments. It features six laser-etched ON-OFF switches with blue LED indicators, a digital voltmeter for real-time monitoring, and dual USB charging ports. Built from a durable blend of aluminum and flame-retardant ABS, it is designed to withstand harsh conditions in boats, RVs, and trailers.

Electrical Specifications

Rated Current

20 A

at 12V DC

10 A

at 24V DC

USB Charging Output

- Port 1: 5V 1A
- Port 2: 5V 2.1A

Operating Voltage

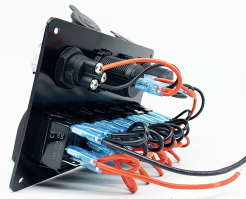

12V / 24V DC

Interface & Controls

Number of Gangs	6
Switch Function	SPST ON-OFF Rocker
Integrated Components	Digital Voltmeter, Dual USB Ports, Cigarette Lighter Socket, Engine Start Button, LED Indicators

Physical Construction

Materials

- Aluminium
- ABS Plastic
- Metal

LED Illumination	Blue
Panel Finish	Local Tyrant Gold

Environmental & Durability

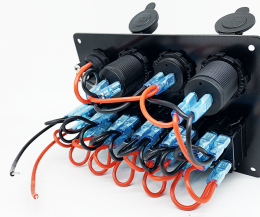

Protection Features

- Waterproof construction
- Dust and debris resistant rubber covers
- Flame retardant materials

Operating Temperature	-25°C to +85°C
-----------------------	----------------

Application

Target Applications

Marine • Boat • RV • Car • Trailer • Bus • Motorcycle
