Overview

Robust Power for Agricultural Machinery

The 178F diesel engine is a reliable 6 HP power source engineered specifically for farm tillers and agricultural equipment. Featuring a single-cylinder, air-cooled, four-stroke configuration, this engine provides high torque and efficient combustion for demanding field conditions. Its compact, durable design ensures longevity and easy integration, while the direct injection system optimizes fuel consumption for cost-effective operation.

Technical Specifications

Power Output

6 HP

Rated Power

6.2 HP

Max Power

Engine Configuration

- Single-cylinder
- Four-stroke
- Air-cooled
- Direct injection system
