Overview

Smart Motion-Activated Lighting

This 6-inch 10W LED downlight offers an intelligent, energy-efficient lighting solution for corridors, hallways, and commercial spaces. Featuring advanced microwave radar sensor technology, it provides 360-degree motion detection that can even penetrate walls and glass. The integrated light sensor automatically manages energy usage by identifying day and night cycles, ensuring the light only activates when needed.

Technical Specifications

Power Consumption	10 W
Cutout Diameter	155 mm
Rated Lifespan	30000 hours
Energy Savings	> 50%

Sensor Capabilities

Sensor Technology	Microwave / Radar
Detection Angle	140 degrees
Detection Range	6-8 meters
Daylight Sensor Threshold	10 lux
Hold Time	18-30 seconds

Applications

Suitable Environments	Hotels, Offices, Corridors, Hallways, Supermarkets, Hospitals, Residential
