

6 inch Abrasive Grinding Wheel for Metal

This 6-inch grinding wheel is designed for metalworking applications. It is suitable for use on steel, stainless steel, and other ferrous metals.

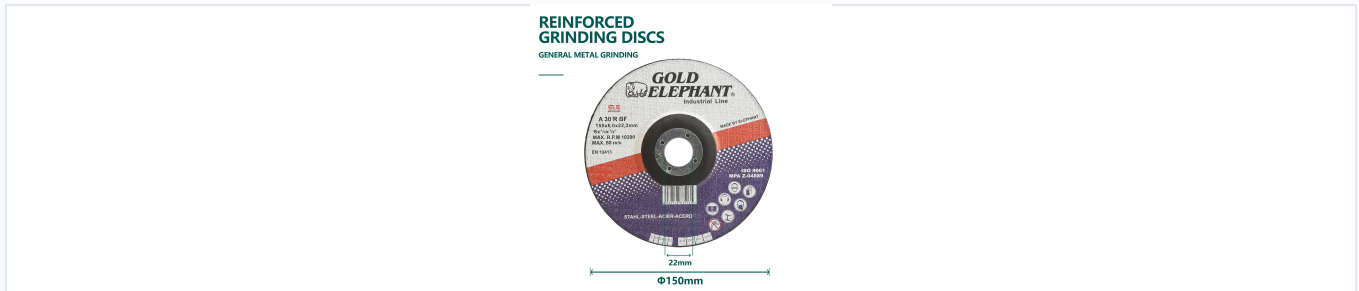

Product Overview

High-Performance Grinding Wheel

This reinforced grinding wheel is engineered for professional metalworking applications, offering high durability and reliable performance. Designed for general metal grinding, it is suitable for use on steel, stainless steel, and other ferrous metals. The wheel meets rigorous safety standards, ensuring consistent quality and security during operation.

Technical Specifications

A 30 R BF specification grinding disc designed for general metal applications.

Dimensions

150 mm
Diameter

6 mm
Thickness

22.2 mm
Bore Size

Performance Ratings

10200 RPM
Max RPM

80 m/s
Max Operating Speed

Specification Code

A 30 R BF

Compliance & Safety

Certifications

ISO 9001, MPA Z-04889, EN 12413

Application & Usage

Compatible Materials

- Steel
- Stainless Steel
- Ferrous Metals
