

6-Inch Aluminum Oxide Grinding Wheel for Bench Grinders

This 6-inch grinding wheel features a medium grit and is constructed from bonded aluminum oxide abrasive. It is designed as a replacement wheel for 6-inch bench grinders with a maximum speed of 4100 RPM.

Product Overview

Professional Grade Grinding Performance

This 6-inch grinding wheel is engineered for reliable performance with bench grinders and compatible power tools. Constructed from durable aluminum oxide abrasive material, it is designed for efficient material removal, surface finishing, and sharpening tasks. Its robust build ensures long-lasting operation, making it an ideal choice for shaping metal and removing rust or imperfections in demanding workshop environments.

Technical Specifications

Compatible Tools

- Bench Grinders
- Compatible Power Tools

Diameter	6 inch
Abrasive Material	Aluminum Oxide
Primary Applications	Tool Sharpening, Metal Shaping, Rust Removal, Surface Finishing

Features

Key Features

Durable Construction • Efficient Material Removal • Secure Mounting
