Product Overview

Professional 6-Inch Pneumatic Sander

This professional-grade 6-inch pneumatic sander is engineered for high-performance surface preparation and finishing. Featuring a heat-treated eccentric shaft and high-quality industrial components, it offers exceptional durability and precision. The low-center-of-gravity, lightweight design minimizes vibration and user fatigue, making it ideal for extended use in demanding industrial environments.

Key Features

Key Features

- Self-vacuuming system for dust collection
- Heat-treated eccentric shaft for durability
- High-quality bakelite rotor blade
- Industrial-grade bearing for long service life
- Low-vibration design for swirl-free finishes

Technical Specifications

Sanding Pad Size	6 inch
------------------	--------

Applications

Best For	Automotive Body Work, Woodworking, Metal Finishing, Weld Processing, Rust Removal
----------	---

Design & Ergonomics

Design Benefits

Lightweight • Low Vibration • Low Center of Gravity
