

6" Jointer Combination Machine with Stand

This combination woodworking machine features a 6" jointer with a close stand. The machine is designed for flattening and smoothing wood surfaces.

Overview

Precision Woodworking Performance

This 6-inch jointer combination machine is engineered for professional woodworking environments, offering a robust 1,100W motor for consistent power. It features a generous table size and a three-knife cutter block design, ensuring smooth, accurate surfacing of wood stock. With versatile fence adjustments and integrated dust management, this unit provides the essential control and cleanliness required for high-quality joinery work.
