Product Overview

High-Performance V-Ribbed Belt

This 6-rib V-ribbed belt is engineered for efficient power transmission in automotive systems, driving essential components like the alternator, power steering pump, and air conditioning compressor. Constructed from durable chloroprene rubber, it is designed to withstand demanding operating conditions and high temperatures. This belt offers reliable performance and longevity, making it an ideal choice for vehicle maintenance and repair applications.

Technical Specifications

Number of Ribs	6
Belt Length	737 mm
Material	Chloroprene rubber
Surface Finish	Rough

Performance & Compatibility

Expected Service Life

30000 KMS
Minimum Range

60000 KMS
Maximum Range

Compatible Vehicle Make	Lada
-------------------------	------

Logistics & Packaging

Packaging Type

- Standard Exporting Carton
- Neutral Packing
- Custom Box

Lead Time

30 days (depending on order quantity)
