

6 x 1/2 x 1-1/4 Inch Abrasive Grinding Wheel

This abrasive grinding wheel is designed for material removal and surface finishing. It has dimensions of 6 inch diameter, 1/2 inch thickness, and a 1-1/4 inch arbor hole.

Product Overview

High-Performance Abrasive Grinding Wheel

This white aluminum oxide grinding wheel is engineered for precision material removal and surface finishing on demanding materials. It is specifically formulated to handle high-hardness metals, including high-speed steel, high-carbon steel, and hardened alloy steels. Designed for durability and consistent performance, it is an essential tool for sharpening, deburring, and shaping metal components.

Dimensions

Diameter	6 inch
Thickness	0.5 inch
Arbor Hole	1.25 inch

Technical Specifications

Material	White Aluminum Oxide
Grade Marking	W46K

Compatibility

Intended Uses

- Tool Sharpening
- Metal Deburring
- Material Shaping
- Surface Finishing

Suitable Materials	High Speed Steel, High Carbon Steel, Hardened Steel, Alloy Steel
