Overview

Versatile 60 HP Agricultural Tractor

This 60 HP wheel tractor is engineered for diverse agricultural environments, including both dry and paddy field operations. Built with advanced European technology, it features a robust chassis and a high-torque engine designed for demanding tasks like plowing, tilling, and harvesting. The ergonomic design and synchronized transmission ensure high operator comfort and efficiency, making it a reliable solution for modern farming needs.

Performance & Engine

Rated Power

60 HP

Engine Power

15 kN

Traction Force

25 %

Torque Reserve

Emissions Standard

Euro II

Transmission & Drivetrain

Gearbox Configuration

Synchronizer 12F+12R

Hydraulics & Implements

Maximum Lifting Force

11.5 kN

Suspension Category

Category II

PTO Rotation Speed

540 RPM, 1000 RPM

Hydraulic Output

Two-way

Features & Options

Compliance & Certifications

OECD • EAC • E-mark

Available Options

- Internal air filter
- External air filter
- Upper exhaust
- Lower exhaust
- Single pipeline air brake
- Double pipeline air brake
