

60-Tooth Weld-On Sprocket for #35 Chain

This weld-on sprocket features 60 teeth and is designed for use with #35 chains. It is made from durable steel, providing a secure and reliable connection for power transmission.

Product Overview

Industrial Weld-On Sprocket

This 60-tooth sprocket is precision-engineered for use with #35 roller chains, serving as a reliable component for power transmission systems. Designed for a weld-on installation, it offers a robust and secure connection to hubs or shafts in various industrial machinery applications. Constructed from durable steel, this sprocket ensures long-lasting performance under standard operating conditions.

Technical Specifications

Installation Method

Weld-On

Number of Teeth

60

Compatible Chain Size

#35 Chain

Material

Steel

Primary Application

Power Transmission, Industrial Machinery
