

6000 kg Capacity Round Sling

This round sling is designed for heavy lifting applications. Its durable synthetic fibers are encased in a protective sleeve, providing strength and flexibility with an endless loop for versatile rigging and even load distribution.

Product Overview

High-Capacity Lifting Solution

The 6000 kg capacity round sling is a heavy-duty lifting tool designed for demanding industrial applications. Featuring a pliable design, it conforms easily to the contours of your load while providing exceptional protection against damage. Its durable polyester jacket shields the core from environmental factors such as UV rays, moisture, and abrasive materials, ensuring long-term reliability and safety.
