

600mm Road Pile Cutter

This 600mm road pile cutter features a four-axis structure to prevent meandering during operation. It is equipped with a water tank that provides cooling, which reduces dust and prolongs blade life.

Product Overview

Professional 600mm Road Pile Cutter

This robust road pile cutting machine is engineered for high-efficiency cutting of road piles and dense materials. It features a large diameter cutting blade powered by a reliable electric motor, all mounted on a maneuverable wheeled chassis. The integrated water cooling system with a dedicated tank effectively manages dust and extends blade life during intensive operations.
