Overview

High-Performance Aluminum Solutions

These 6063 T5 aluminum profiles are specifically engineered for sliding window applications, offering a perfect balance of strength and durability. Designed for precision and reliability, these profiles provide excellent corrosion resistance, making them ideal for diverse construction and architectural projects. With a focus on smooth sliding action and a sleek modern aesthetic, they ensure long-lasting performance in demanding environments.

Material Specifications

Alloy Grade

6063

Temper

T5

Key Properties

Corrosion Resistance, High Strength, Durable, Precision Engineered

Application & Usage

Other Applications

- Architectural Projects
- Construction Machinery Parts
- Structural Applications
- Window Framing Systems

Primary Application

Sliding Window Systems

Customization

Customization Capabilities

- Customized Dimensions
- Various Surface Finishes
- Custom Extrusion Profiles
