

607 Deep Groove Ball Bearing

This deep groove ball bearing is designed for various industrial applications. Its hardened steel construction ensures durability and smooth operation.

Product Overview

High-Precision 607 Deep Groove Ball Bearing

The 607 deep groove ball bearing is engineered for high-precision performance across a wide range of industrial applications. Featuring hardened steel construction, these bearings are designed for durability and smooth operation with reduced friction. Their deep groove design ensures efficient load distribution, making them an ideal choice for high-speed machinery and equipment requiring an extended lifespan.

Technical Highlights

Noise Level

Low Noise

Quality & Standards

Quality Certifications

ISO9001:2000

Material & Construction

Design Features

- Deep groove geometry for efficient load distribution
- Reduced friction for smooth operation
- Optimized for high-speed applications

Construction Material

Hardened Steel

Applications

Recommended Use Cases

- Electric motors and appliances
- Gearboxes and internal combustion engines
- Instruments and meters
- Transportation vehicles
- Agricultural and construction machinery
