

# 60A 2-Pole Air Conditioning Magnetic Contactor

This 2-pole magnetic contactor is rated at 60A and 120V, designed for air conditioning systems. It is engineered for switching and controlling electrical circuits in HVAC&R applications.

## ADDITIONAL IMAGES

## Overview

### Reliable HVAC Switching Solution

This 2-pole definite purpose magnetic contactor is engineered specifically for air conditioning and refrigeration applications. It provides robust electrical switching capabilities suitable for residential, commercial, and industrial HVAC systems. Designed for durability and performance, this component ensures reliable control of electrical circuits under demanding operating conditions.

## Technical Specifications

### Rated Current

**60 A**  
Current

### Number of Poles

2

### Coil Voltage

120 V

## Business Terms

### Quality Assurance

- 100% self-inspection
- Pre-packing testing

### Order Fulfillment

Category	Details
Lead Time	15-20 days
Payment Terms	30% deposit, balance against B/L copy

### Service Capabilities

OEM, ODM
