

60cm Combination Gas and Electric Cooktop

This 60cm hob offers both gas and electric cooking options. The stainless steel surface ensures durability and easy cleaning.

Product Overview

Versatile 60cm Hybrid Cooking Solution

This 60cm stainless steel cooktop combines the rapid heat of gas burners with the consistent performance of an electric heating element, offering professional versatility for modern kitchens. Built with a durable stainless steel surface, it is designed for both longevity and easy maintenance in high-use environments. The integrated front-mounted control knobs provide precise temperature management across all four cooking zones.
