Product Overview

High-Performance Ku-Band Satellite Antenna

This 60cm Ku-band satellite antenna is engineered for optimal signal reception and transmission, making it a reliable choice for diverse satellite communication applications. Its robust construction ensures durability and weather resistance, providing consistent performance in challenging environmental conditions. Designed for versatility, this unit is suitable for both residential and commercial installations, offering high-quality signal acquisition for various communication needs.

Technical Specifications

Antenna Diameter	60 cm
Frequency Band	Ku-Band
Mounting Type	Ground Mount, Wall Mount

Compliance & Certification

Certifications

SGS • LXTV

Application Suitability

Ideal For

- Residential Satellite Communication
- Commercial Satellite Communication
- General Signal Reception
