

60t Hydraulic Crawler Crane

This hydraulic crawler crane has a maximum lifting capacity of 60t. It features a robust crawler undercarriage for stability and maneuverability on uneven terrain.

Overview

High-Performance Hydraulic Crawler Crane

This hydraulic crawler crane is engineered for heavy-duty lifting operations across diverse industrial and construction environments. It features a robust, smart-engineered box-type upper structure that ensures a low center of gravity and exceptional stability. With efficient hydraulic systems allowing for simultaneous operation at low engine RPM and a modular design, this machine offers both reliability and ease of maintenance for demanding job sites.

Technical Specifications

Detailed Technical Data

Specification	Value
Main Boom Length	10.8-38 m
Boom Derricking Angle	-3-83 degrees
Jib Lengths	8/14 m
Rope Speed	116 m/min
Swing Speed	0-1.96 r/min
Travel Speed	0-2.5 Km/h
Ground Bearing Pressure	0.076 Mpa

Winch System

- Main/Aux. Winch Rope Length: 170/130 m
- Rope Diameter: 22 mm
- Rated Single Line Pull: 7.5 t (73.5 kN)
