

60V 500W Submersible Solar Water Pump

This submersible pump is designed for efficient water extraction using solar power. Operating at 60V and 500W, it is ideal for remote locations, irrigation, and domestic water supply where grid power is unavailable.

Overview

High-Efficiency Solar Water Solution

This submersible solar water pump is engineered for reliable water extraction in remote locations where grid power is unavailable. Designed with a robust stainless steel body and a multi-stage impeller system, it ensures long-term durability and performance. It is an ideal solution for irrigation, domestic water supply, and off-grid agricultural needs, providing consistent operation powered directly by solar energy.

Technical Specifications

Voltage	60 V
Power Rating	500 W
Model Type	4QJ60V/500W/3-5

Performance Metrics

Flow Rate vs Head Height

Flow Rate	Head Height
10 L/min	38 m
50 L/min	25 m
90 L/min	7 m

Features

Certifications

CE

Ideal Applications

- Remote irrigation systems
- Domestic water supply
- Off-grid water extraction

Construction Materials

Stainless Steel Body, Multi-stage Impeller
