

60W Backpack Laser Cleaning System

This compact laser cleaning system is designed for portability and precision. The 60W laser effectively removes rust, paint, coatings, and contaminants from various surfaces without substrate damage.

Product Overview

Portable Industrial Laser Cleaning

The 60W Backpack Laser Cleaning System is a portable, high-efficiency solution designed for industrial surface preparation and restoration. Utilizing high-power density laser technology, it effectively removes rust, paint, coatings, and contaminants without damaging the underlying substrate. Its ergonomic, backpack-mounted design ensures maximum mobility, making it ideal for accessing tight spaces and performing on-site maintenance.

Technical Specifications

Laser Power

60 W

Laser Power

Cleaning Technology

High power density laser beam scanning

Applications & Usage

Primary Applications

- Rust removal on metal surfaces
- Surface oil, stain, and dirt cleaning
- Coating and paint removal
- Pre-treatment of welding and spraying surfaces
- Dust cleaning from stone
- Rubber residue cleaning from moulds

Features

Environmental Impact

Green Cleaning Method • Non-polluting • Eco-friendly

Design & Ergonomics

Backpack Design, Portable, Handheld Gun, Ergonomic
