

# 60W Washing Machine Motor with 12-44 Shaft

This 60W washing machine motor, model WJ-M903, features a 12-44 shaft configuration. It is designed to deliver the torque and speed required for effective washing and spinning cycles in various washing machine models.

## Product Overview

### Reliable Performance for Washing Systems

The WJ-M903 motor is a robust 60W component engineered for reliable operation in diverse washing machine applications. Designed with a 12-44 shaft configuration, it provides the consistent torque and speed necessary for both washing and spinning cycles. Its durable construction ensures longevity and efficient performance, making it an ideal choice for both replacement parts and new equipment designs.

## Technical Specifications

### Power Rating

**60 W**  
Power

Shaft Diameter	12 mm
Shaft Length	44 mm
Model Identifier	WJ-M903

## Application & Features

Compatible Applications	Washing Machine Replacement, New Machine Manufacturing, Home Appliance Maintenance
