

6208 Deep Groove Ball Bearing

The 6208 deep groove ball bearing is designed for low noise and high-speed performance. Its deep, uninterrupted raceway grooves allow it to handle both radial and axial loads.

Overview

High-Precision 6208 Deep Groove Ball Bearing

This 6208 deep groove ball bearing is engineered for optimal performance and durability across diverse industrial applications. Featuring deep, uninterrupted raceway grooves, it is designed to handle both radial and axial loads in either direction with high efficiency. Built for smooth operation and reduced friction, this component is an ideal solution for machinery such as electric motors, pumps, and gearboxes.

Performance

Key Performance Attributes

- Low noise operation
- High-speed capability
- Designed for reduced friction
- Handles radial and axial loads

Quality Standards

Certifications

ISO 9001:2008

Applications

Typical Industrial Applications

- Electric motors
- Pumps
- Gearboxes
- General industrial machinery
