

6.35mm Mono Audio Plug Connector

This is a robust and reliable electrical connector, specifically a 1/4-inch (6.35mm) mono audio plug. It is designed for secure and stable signal transmission in audio applications, suitable for connecting instruments, headphones, and other audio equipment.

Product Overview

Professional Mono Audio Connectivity

This 6.35mm (1/4-inch) mono audio plug is engineered for reliable signal transmission in demanding audio environments. Designed with a durable black plastic housing, it provides essential insulation and physical protection for long-term use. It serves as an ideal solution for technicians and hobbyists looking to connect instruments or professional audio equipment with consistent signal integrity.

Technical Specifications

Connector Type	6.35mm (1/4-inch) Mono Plug
Housing Material	Durable Plastic
Housing Color	Black

Applications

Primary Applications	Musical Instruments, Professional Audio Equipment, DIY Projects, Signal Transmission
