

63A Miniature Circuit Breaker

This miniature circuit breaker is designed for electrical protection in industrial and residential settings. It features a 400V voltage rating, 50/60Hz frequency, and compliance with EN60898 and IEC60898 standards.

Product Overview

Reliable Circuit Protection

This miniature circuit breaker (MCB) is engineered to provide robust electrical protection for both industrial and residential environments. Designed for efficiency and safety, it supports high-performance operation with a 400V voltage rating and reliable 50/60Hz frequency compatibility. It adheres to international safety standards, ensuring consistent performance in demanding electrical systems.

Electrical Specifications

Rated Current

63 A

Rated Current

Voltage Rating	400 V
Frequency	50/60Hz
Tripping Characteristic	C20

Compliance & Standards

Certifications

CE • EN60898 • IEC60898

Breaking Capacity	6000 A
-------------------	--------

Application

Suitable Environments

- Industrial Applications
- Residential Applications
