

## 6.5" Car Audio Component Speaker System

This component speaker system has a high-performance woofer and optimized surround for accurate sound. It includes a tweeter for clear high frequencies and a crossover network for integration.

### Product Overview

#### High-Performance Audio Precision

This 6.5-inch component speaker system is engineered to provide an immersive and accurate audio experience for automotive environments. Featuring a rigid woofer cone paired with a dedicated tweeter and a precision crossover, the system ensures seamless integration across the entire frequency spectrum. It is designed for those seeking a balance of powerful output and high-fidelity sound clarity.

### Technical Specifications

Driver Size	6.5 inches
Impedance	4 $\odot$
Maximum Peak Power	150 W
Model Identifier	TL-T1604

### Features

#### System Components

- High-performance woofer
- Dedicated tweeter
- Crossover network
