

6.5 HP Horizontal Gas Engine

This 6.5 HP horizontal gas engine starts quickly and easily, providing steady and reliable power for extended operation. The engine features an advanced OHV design for enhanced performance and reduced fuel consumption, while also increasing overall durability.

Overview

High-Performance Horizontal Gas Engine

This 6.5 HP horizontal gas engine is designed for reliability and consistent performance in demanding work environments. Featuring an advanced OHV design, it optimizes fuel efficiency and durability while providing steady power output. With versatile starting options and multiple PTO shaft configurations, it is an adaptable power source suitable for generators, water pumps, tillers, and various other equipment.

Performance

Maximum Output

6.5 hp

Power

4000 rpm

Rated RPM

Maximum Torque	1.35 kg/m
Displacement	196 cc

Technical Details

Compression Ratio	8.5:1
Ignition System	TCI
Starting System	Recoil, Electric (Optional)
Air Cleaner	Dual silent (Semi-dry)

Capacities

Fuel Tank Capacity	3.6 L
Oil Capacity	0.6 L

Physical Dimensions

Physical Dimensions

Measurement	Metric	Imperial
Bore * Stroke	68 * 54 mm	2.68 * 2.13 inch
Overall (L*W*H)	315*362*335 mm	12.4*14.2*13.1 inch
Net Weight	16 kg	

Operational Environment

Noise Level

78 dBA
