Product Overview

Reliable Portable Power Solution

This 6.5 KW portable gasoline generator is engineered for independent power supply, making it an ideal choice for home backup and professional use in areas without grid access. Featuring a robust design with integrated safety systems like oil alerts and fuse protection, it ensures stable performance for essential appliances. Its versatile output options, including both AC and DC, provide a dependable and user-friendly energy source for various residential and light commercial applications.

Performance Metrics

Key Performance Metrics

6.5 kW Max Power Output	50 Hz Frequency	25 L Fuel Capacity

Technical Specifications

Model Comparison Table

Feature	GG950	GG4500	GG6200
Type	Soundproof	Open Frame	Open Frame
Max AC Output	0.72 kW	3.8 kW	5.5 kW
Rated AC Output	0.65 kW	3.2 kW	5.0 kW
Phase	Single	Single/3 Phase	Single/3 Phase
Starting System	Recoil	Recoil/Electric	Recoil/Electric

Engine & Fuel

Engine Configuration	4-stroke, air-cooled, OHV (High-capacity models)
Fuel Tank Capacity	25 L

Control & Interface

The intuitive control panel features a voltmeter, digital display, and dedicated AC/DC outputs with safety fuse protection.

Available Outlets

- AC 220V Outlets
- DC 12V 8.3A Output
- Voltmeter Display
- Digital Status Display

Safety & Protection

Oil Alert Lamp, DC Fuse Protection, AC Switch, Low Oil Warning, Auto-Stop

Compliance & Quality

Certifications

ISO 9001 • CE

Operational Safety

Usage Requirements

- Check fuel and engine oil levels before starting
- Do not operate indoors or in unventilated places
- Turn off generator when adding fuel
