

6.5HP 196cc Gasoline Engine with Recoil Start

Single cylinder, 4-stroke, air-cooled gasoline engine featuring a recoil starting system and horizontal shaft. Its overhead valve (OHV) design enhances efficiency and reduces emissions, making it suitable for small machinery like generators, water pumps, and agricultural equipment.

Product Overview

Robust 196cc Performance

This 6.5HP 196cc gasoline engine is designed for reliability and efficiency in demanding work environments. Featuring a 4-stroke, air-cooled system and an overhead valve (OHV) design, it optimizes fuel consumption while reducing operational emissions. With its horizontal shaft and recoil start mechanism, this unit is an ideal power solution for small machinery including generators, water pumps, and diverse agricultural equipment.

Technical Specifications

Displacement	196 cc
Power Output	6.5 HP
Fuel Tank Capacity	3.6 L
Oil Capacity	0.6 L

Design Features

Starting System

Recoil Start

Core Design

Single cylinder, 4-stroke, Air-cooled, OHV design, Horizontal shaft
