Product Overview

A 65L capacity humidor featuring thermoelectric cooling for stable temperature and humidity control.

Premium 65L Thermoelectric Cigar Humidor

This 65L thermoelectric cigar cooler is engineered to provide the ultimate storage environment for professional collectors. Utilizing advanced solid-state cooling technology, it maintains precise temperature and humidity levels to preserve the delicate flavor and aroma of your cigars. Featuring adjustable wooden shelves and a digital control interface, this unit combines energy efficiency with a sleek, portable design suitable for high-end office or home settings.

Capacity & Performance

Integrated analog hygrometer for precise real-time humidity monitoring.

Net Volume

65 L

Storage Capacity

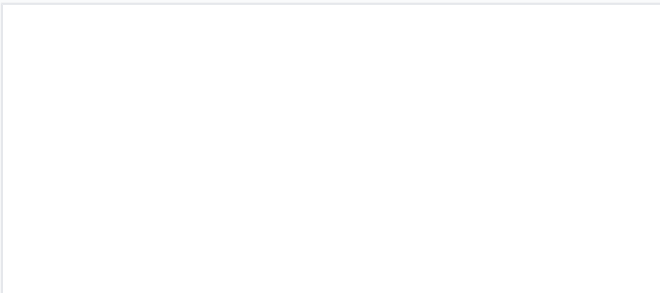

Temperature Range

Zone	Range (Celsius)
Upper Zone	12°C - 18°C
Lower Zone	8°C - 18°C

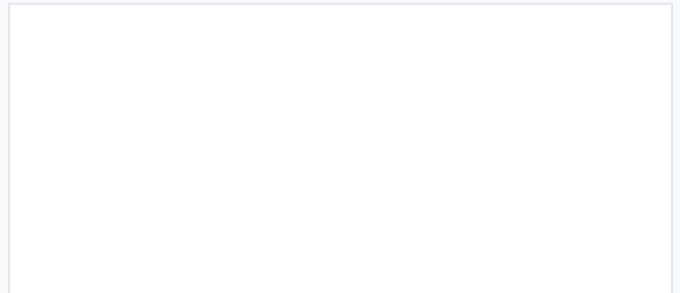

Power Specifications

- Power Input: 70W
- Voltage: 110V or 220V
- Frequency: 50~60Hz
- Low power consumption

Design & Construction

Sleek design featuring a stainless steel frame and glass door for easy inventory viewing.

High-quality rubber seals and aluminum frame ensure maximum insulation and energy efficiency.

Dimensions

Type	Width (mm)	Height (mm)	Depth (mm)
Unit Dimension	460	738	520
Packing Dimension	510	780	570

Key Features

Eco-Friendly, Low Noise, Portable, Aluminum Glass Door Frame, Wooden Shelves, Digital Display, Interior Light

Compliance & Quality

International Standards

ISO 9001 • CE • CB • GS • TUV • ETL Listed • EMC • BSCI • Pass DOE

Storage System

Durable wooden drawers designed for optimal air circulation and cigar preservation.

Natural Wood Shelving

The humidor is equipped with adjustable wooden shelves and drawers specifically designed to promote natural air circulation. This ensures even cooling and humidity distribution throughout the 65L cavity, preventing mold growth and protecting cigars from drying out.
