

65W GaN USB-PD Charger

This compact adapter utilizes GaN technology for high power density and reduced heat. It supports USB-PD and is suitable for international use with its 100-240V input range.

Overview

Compact GaN Power Solution

This 65W GaN (Gallium Nitride) USB-PD charger is engineered for high-efficiency power delivery in a remarkably compact form factor. Utilizing advanced synchronous rectification, it achieves conversion rates of up to 90% while maintaining a minimal physical footprint. It is an ideal versatile charging solution for modern laptops, tablets, and smartphones that require rapid, reliable power.

Technical Specifications

Total Output Power

65 W

Total Output

USB-C PD Output Profiles

Voltage	Current
5V	3A
9V	3A
12V	3A
15V	3A
20V	3A

Input Voltage Range 100-240V AC, 50/60Hz

PPS Output Range 3.3V-21V / 3A

Physical Attributes

Dimensions	51mm x 26mm x 51mm
Weight	107 g

Compliance & Compatibility

Safety Certifications CE • RoHS • FC	
Charging Compatibility	USB-C, USB-PD, QC3.0
