

6FM7 Sealed Lead-Acid Battery 12V 7Ah

This is a sealed VRLA battery with CE and UL approvals. It has a 12V voltage rating and a 7Ah capacity at a 20-hour discharge rate.

Overview

Reliable VRLA Power Solution

The 6FM7 is a high-performance sealed lead-acid rechargeable battery engineered for versatility and reliability. Designed for both cycle and standby applications, this 12V 7Ah unit provides a consistent power source for critical systems. It features a sealed, maintenance-free construction that ensures safety and longevity when used within recommended charging parameters.

Electrical Specifications

Voltage	12 V
Capacity	7 Ah
Discharge Rate	20-hour

Charging Parameters

Cycle Use Voltage	14.4-15.0V
Standby Use Voltage	13.5-13.8V
Initial Charging Current Limit	2.1 A

Compliance & Safety

Safety Warnings

- Do not short circuit
- Must be recycled or disposed of properly
- Sealed lead battery

Certifications	CE, UL
