

6HP Industrial Engine

This is a robust 6HP engine designed for various industrial applications. It features a durable construction and a recoil starter.

Overview

Industrial Performance

This robust 6HP industrial engine is engineered for reliability and consistent performance in demanding work environments. Designed with durability in mind, it features a user-friendly recoil starter and clear operational instructions for ease of use. It is an ideal power solution for various industrial applications requiring dependable output.

Technical Specifications

Power Output

6 HP
Power

Starting Method

Recoil starter

Maintenance

Maintenance Schedule

Environment	Service Interval
Normal	30-50 hours
Harsh	8 hours

Cleaning Instructions

- Use only clean engine oil for cleaning components
- Do not use diesel for cleaning
- Ensure oil pan is filled to the oil level line before operation
