Product Overview

Versatile Portable Power Solutions

This series of portable gasoline generators offers reliable power solutions for diverse needs, ranging from compact 0.72kW units to robust 5.5kW models. Designed for efficiency and ease of use, these generators feature air-cooled engines, flexible starting systems, and options for single or three-phase power output. Whether for construction sites, outdoor events, or emergency backup, these units provide consistent performance with user-friendly control panels and portable, wheel-mounted designs.

Technical Specifications

Noise Level

89 dB(A)
Noise (GG950)

96 dB(A)
Noise (GG4500)

Frequency

50/60 Hz

Engine & Operation

User-friendly control panel featuring starter switch, oil alert lamp, and voltage monitoring.

Engine Configurations

- 2-stroke, air-cooled, single-cylinder (GG950)
- 4-stroke, air-cooled, OHV (GG4500/GG6200)

Fuel Tank Capacity

2.7 L

Small Capacity

25 L

Large Capacity

Starting Methods

Recoil, Electric

Performance Comparison

Model Performance Data

Model	Max Output (kW)	Rated Output (kW)	Phase
GG950	0.72	0.65	Single
GG4500	3.8	3.2	Single/3-Phase
GG6200	5.5	5	Single/3-Phase
