Product Overview

High-Performance Automotive Ribbed Belt

This ribbed belt is engineered for optimal power transmission in automotive engine systems, utilizing a specialized multi-ribbed design to ensure efficient grip and minimize slippage. Constructed from durable, high-temperature resistant materials, it provides reliable performance and a longer service life in demanding environments. The design incorporates anti-static properties and oil resistance, ensuring operational safety and smooth, quiet engine functionality.

Technical Specifications

Belt Configuration	6PK
Effective Length	1199 mm
Key Features	Oil Resistant, Heat Resistant, Anti-static, Reduced Slippage, OEM Compliant
