

6V 12V 24V Automotive Battery Tester with Neon Indicator

This automotive battery tester is designed to test the voltage of automotive batteries. It supports 6V, 12V, and 24V systems and features a neon light to indicate voltage levels.

Overview

Professional Battery Testing Solution

This versatile automotive battery tester is engineered for reliable voltage diagnostics across a wide range of vehicle systems. Supporting 6V, 12V, and 24V batteries, it utilizes a high-visibility neon indicator to provide clear, immediate feedback. Designed for convenience and durability, the tool includes a 1-meter coiled cord for flexible reach and a secure pocket clip for portability.

Technical Specifications

Supported Voltages	6V, 12V, 24V
Cord Length	1 m
Indicator Type	Neon Light

Features

Included Accessories

- Crocodile clip
- Spare bulb
- Integrated pocket clip

Certifications

CE

Model Number	KKE0017
